

“Electoral System Of India”

A project in subject of

Informatics Practices (code 065)

Board Roll Number -
School - St. Xavier's School, Nevta
Academic year (2020-21)

Acknowledgement

In the accomplishment of this project successfully, many people have best owned upon me their blessings and the heart pledged support, this time I am utilizing to thank all the people who have been concerned with this project.

Primarily I would thank God for being able to complete this project with success. Then I would like to thank my Principal ***Rev. Fr. Sangeeth Raj S.J.***, Vice Principal ***Rev. Fr. Jebamalai, S.J.*** and Academic Coordinator ***Mr. Abin Varghese.***

I would also like to thank Informatics Practices teacher ***Mr. Pankaj Chadha***, whose valuable guidance has been the ones that helped me patch this project and make it full proof success. His suggestions and his instructions have served as the major contributor towards the completion of the project.

I would like to thank my parents and friends who have helped me with their valuable suggestions and guidance has been very helpful in various phases of the completion of the project.

Last but not the least I would like to thank my classmates who have helped me a lot.

Tanmay Singhal

(Class: XII - A)

St. Xavier's School, Nevta

Laboratory Certificate

This is to certify that Tanmay Singhal of Class XII - A has successfully completed his/her project work on “ELECTORAL SYSTEM OF INDIA” in Informatics Practices (Code 065) and hereby submitting his/her report as an evidence of the project work for the session 2021 - 2022.

Fr. Sangeeth Raj SJ

Principal

St. Xavier's School, Nevta

Pankaj Chadha

Project Description

This project titled “**Electoral System Of India**” was chosen with the intent to learn behind the scenes of the one of the biggest democracy’s festival that is elections and what preparations go to reach election day. This project aims to touch all the major components of **ECI (Election Commission of India)** like registering eligible candidates, voters, conducting elections with an added perk of analysis of performance of various parties, participation of people etc.

All the data whether generated during running of the program or collected previously are stored in spreadsheets in **.CSV** format which have been discussed in detail in later parts of this report. There are in total four python files in this project, namely, **election.py**, **graphs.py**, **registrations.py** and **IP class XII Practical.py** which have their own separate functions like IP class XII Practical.py file is used to run the portal and is used by the user while all the other files are back end files and has all the necessary functions to run the main file. **election.py** has all the functions for conduction of election at the portal and counting the votes, **graphs.py** has all the functions for analysis of various things as discussed above, while **registrations.py** has all the functions for registrations of eligible candidates and voters.

Moreover we have 3 CSV files, namely, **history.csv**, **representatives.csv**, **voters.csv** for storing of all the data related to the project. Among them the history.csv stores all the data related to elections conducted in past with various columns used during in depth analysis, representatives.csv stores all the data of the candidates contesting in the election along with their party names, while voters.csv stores the data of the registered voters along with their uniquely generated voter ID during their registration.

There is a text file as well named **README.txt** with all the instructions needed on how to run the program correctly for the user with clear instructions to run IP class XII Project.py only and do not corrupt any back end files as this will result in the failure of efficient working of the project.

Program is extremely user friendly and totally bug free with very less chances of throwing an error although that also has been taken care of as we will see in the source code. By the means of this project I learned a lot of new things about our ECI and its working which often left unseen.

Data Source

1. **Source of Data :** All the data was collected from trusted websites like -

- A. <https://loksabha.nic.in/>
- B. <https://www.kaggle.com/>
- C. <https://eci.gov.in/>
- D. <https://data.gov.in/>

2. **Structure of CSV files :** Structure of various CSV files is listed below -

A. history.csv

Columns :

Year, votes, Bhartiya Janta Party, Bahujan Samaj Party, Communist Party of India, Communist Party of India (Marxist), Indian National Congress, Nationalist Congress Party, Independent, Others, Participation

B. representatives.csv

Columns :

Name of Member, Constituency & State, Party Name

C. voters.csv

Columns :

Voter name, Constituency & State, Voter ID

3. Data in CSV's : Following data is there within the given CSV's :

A. history.csv (19 records)

	A	B	C	D	E	F	G	H	I	J	K
1	Year	votes	Bhartiya Jar	Bahujan Sa	Communist	Communist	Indian Natio	Nationalist	Independer	Others	Participation

Menu Layout

Main Menu along with sub menus :

A. Register Voter

- a. Enter your Name ...
- b. Enter your age ...
- c. Enter your constituency ...
- d. Enter your state ...
- e. Confirm Registration (Y/N)? ...

B. Register Candidate

- a. Enter your first name ...
- b. Enter your last name ...
- c. Enter your age ...
- d. Select your party number or choose independent if candidate is independent
 - 1) All India United Democratic Front
 - 2) All India Trinamool Congress
 - 3) Bhartiya Janta Party
 - 4) Shiromani Akali Dal
 - 5) Communist Party of India
 - 6) Indian National Congress
 - 7) Nationalist Congress Party
 - 8) Communist Party of India (Marxist)
 - 9) Bahujan Samaj Party
 - 10) Independent
- e. Enter your constituency ...

- f. Enter your state ...
- g. Confirm Registration (Y/N)? ...

C. Conduct elections

- a. Enter current year for election conduction ...
(if above entered year has less than 5 year gap from last conducted elections then following options are laid else elections are started)
- b. Over ride the gap (Y/N)? ...
(if elections starts :)
- c. Please enter voter ID or type "end" to end the elections...
- d. Parties/Candidates contesting from you constituency i.e. <voter's constituency>
<List of all parties candidates contesting from voters constituency>
(if 'end' is written in voter ID)
- e. Display results (Y/N)? ...

D. Analysis

- a. Select mode of analysis by its number
 - 1) Comparison between parties over the years
(Required graph is displayed)
 - 2) Particular party performance
 - I) Select a party by its indicated number
 - 1) Bhartiya Janta Party
 - 2) Bahujan Samaj Party
 - 3) Communist Party of India
 - 4) Communist Party of India (Marxist)
 - 5) Indian National Congress
 - 6) Nationalist Congress Party

7) Independent

8) Others

(Analyzed result is displayed according to selected option then following menu is laid)
